In October 2015 I began a presentation with reference to “How South Africa Works and Must Do Better” by Greg Mills and Jeffrey Herbst. They quote Mr Lesetja Kganyago, Governor of the South African Reserve Bank and I repeat that quote:

“South Africa’s economy has enormous potential. But to realise this, we need the efforts and leadership of all. This cannot just come from one person. All of us occupying positions of leadership have a responsibility to put the interests of tomorrow ahead of today.”

We are in the process of crafting a new nation, the last 25 odd years have only been the start of our new future and it has been an awesome change that makes many other Nations most envious of what we have achieved. While this passing of time may feel like a lifetime to some, in the greater scheme of things it is but a brief moment in history.

I believe in a Vision that extends beyond the current needs, which has a view of our Nation prospering and fulfilling the aspirations of all our people.

I know that I am not alone with such a vision. I believe that we have the people willing to create this vision and that we have the skills to craft this vision. I believe that everything we do is challenging the current narrative, that we have the will and the drive to create a better world.

THIS IS WHY WE, THE SANDTON CPF, DO WHAT WE DO!

ANTHONY MODENA, SANDTON CPF CHAIRMAN
